# CONTENTS

Chapter 1	MINIMIZATION OF THE COUPLING BETWEEN A TWO CONDUCTOR MICROSTRIP TRANSMISSION LINE USING FINITE DIFFERENCE METHOD	1
	<i>A. Z. Elsherbeni, C. E. Smith, and B. Mounneh</i>	
	1. Introduction	1
	2. Finite Difference Analysis	5
	3. Approximate Boundary Condition	8
	4. Computation of Total Charge and Line Parameters	10
	5. Numerical Results	12
	6. Summary and Conclusion	32
	Acknowledgments	32
	References	33
Chapter 2	DIFFERENCES BETWEEN MODAL EXPANSION AND INTEGRAL EQUATION METHODS FOR PLANAR NEAR-FIELD TO FAR-FIELD TRANSFORMATION	
	<i>P. Petre and T. K. Sarkar</i>	
	1. Introduction	37
	2. Modal Expansion Method	39
	3. Integral Equation Approach	42
	4. Numerical Examples	45
	5. Conclusion	54
	Acknowledgment	55
	References	55
Chapter 3	APPLICATION OF WAVELET TRANSFORM IN TARGET IDENTIFICATION	
	<i>H. J. Li and K. M. Li</i>	
	1. Introduction	57
	2. Wavelet Transform and Multiscale Edge Detection	58

	3.	Application of Wavelet Transform to Feature Representation	59
	4.	Recognition Performance	67
	5.	Discussion and Conclusion Reducation	72
		Acknowledgment	72
		References	72
Chapter 4		<b>MODELING MULTIPLE INTERACTING SMALL APERTURES FOR EMI APPLICATIONS USING THE FINITE-DIFFERENCE TIME-DOMAIN TECHNIQUE</b>	
		<i>J. H. Oates, R. T. Shin, and M. J. Tsuk</i>	
	1.	Introduction	75
	2.	Analytical Solution for a Finite Array of Apertures	76
	3.	Isolated Aperture Formulation for Sources on Both Sides of the Screen in Cartesian Coordinate	87
	4.	Correcting the FDTD Dipole Fields	90
	5.	Evaluation for Closely-Spaced Apertures	96
	6.	Conclusion	102
		Acknowledgment	103
		References	103
Chapter 5		<b>USE OF FRACTIONAL INTEGRATION TO PROPOSE SOME "FRACTIONAL" SOLUTIONS FOR THE SCALAR HELMHOLTZ EQUATION</b>	
		<i>N. Engheta</i>	
	1.	Introduction	107
	2.	Fractional Differintegral Relation Between One- and Two-Dimensional ScalarGreen's Functions of Helmholtz Operator	111
	3.	How About nth-order Fractional Integral of One-Dimen-\break sional Green's Function?	115
	4.	Physical Remarks	125
	5.	Generalization to Higher Dimensions	127
	6.	Summary	131
		Acknowledgments	131
		References	132

Chapter 6	<p>A HYBRID FORMULATION BASED ON UNIMOMENT METHOD FOR INVESTIGATING THE ELECTROMAGNETIC SHIELDING OF SOURCES WITHIN A STEEL PIPE</p> <p><i>X. Xu and X. Yang</i></p>	
	1. Introduction	133
	2. Equivalent Models	135
	3. Formulation of Integral Equations and Unimoment Method	137
	4. Finite Element Analysis	142
	5. Formulation of Supplemental Equations	148
	6. An Iterative Solution Procedure	152
	7. Computation of Electromagnetic Fields	153
	8. Numerical Results	154
	Acknowledgement	156
	References	156
Chapter 7	<p>EVOLUTION TIME OF THE ELECTROMAGNETIC WAVE INSTABILITY IN METALS UNDER THE ACTION OF A CURRENT PULSE</p> <p><i>A. B. Rinkevich and V. V. Ustinov</i></p>	
	1. Introduction	159
	2. Methods	160
	3. Results	162
	4. Discussion	169
	5. Conclusion	175
	Acknowledgement	175
	References	175
Chapter 8	<p>INPUT IMPEDANCE ANALYSIS OF A MICROSTRIP ANNULAR-RING ANTENNA WITH A THICK SUBSTRATE</p> <p><i>H. Liu and X.-F. Hu</i></p>	
	1. Introduction	177
	2. Formulation	178

3.	Galerkin's Method and Characteristic Equation for Eigenvalue	180
4.	Fields Excited by the Probe	183
5.	Galerkin's Method with Singularity Subtraction	186
6.	Input Impedance of the Probe Excited Antenna	188
7.	Results and Discussions	189
8.	Conclusion	198
	Appendix A	198
	Acknowledgement	202
	References	202
Chapter 9	AN ALTERNATIVE APPROACH TO THE HERTZ VECTOR <i>W. Gough</i>	
1.	Introduction	205
2.	Alternative Approach	206
3.	The Equations of Electromagnetism	209
4.	Lorentz Transformation (LT)	210
5.	Examples	211
6.	Gauge Transformation	215
7.	Quantum Mechanical Applications	216
8.	Conclusion	216
	Acknowledgement	217
	References	217
Chapter 10	SCALARIZATION APPROACH IN THE THEORY OF EM WAVES IN A PLANE-LAYERED BIANISOTROPIC MEDIUM: GENERAL FORMULATIONS <i>N. P. Zhuck and A. S. Omar</i>	
1.	Introduction	219
2.	Scalarization of Field Quantities in the Spectral Domain	223
3.	Dyadic Green's Functions	229
4.	Planar Excitation in the Interface	235
5.	Plane-Wave Diffraction and Natural Mode Propagation Problems	239

6.	Conclusion	242
	Appendix A	243
	Appendix B	245
	Appendix C	246
	Acknowledgements	247
	References	247
Chapter 11	FINITE DIFFERENCE TIME DOMAIN CHARACTERIZATION OF INDOOR RADIO PROPAGATION <i>L. Talbi and G. Y. Delisle</i>	
1.	Introduction	251
2.	Application of FDTD Algorithm to Wave Propagation	253
3.	Simulation of the Source	256
4.	Implementation of the Algorithm	259
5.	Considerations for Algorithm Implementation	262
6.	Simulation and Experimental Results	265
7.	Conclusion	273
	Acknowledgments	273
	References	273
Chapter 12	ASYMPTOTIC EXPANSIONS FOR GREEN'S DYADICS IN BIANISOTROPIC MEDIA <i>B. Jakoby and F. Olyslager</i>	
1.	Introduction	277
2.	Theory	278
3.	Green's Dyadic for Diagonally Bianisotropic Media	290
4.	Conclusions	296
	Appendix A	297
	Appendix B	298
	Appendix C	299
	Appendix D	300
	Acknowledgments	301
	References	301

Chapter 13	MUELLER MATRICES FOR SCATTERING FROM CHIRAL COATED CURVED SURFACES <i>J. C. Liu and D. L. Jaggard</i>	
1.	Introduction	303
2.	Electromagnetic Chirality and Curved Geometries	304
3.	Examples and Results	311
4.	Conclusion	327
	Appendix	328
	Acknowledgment	332
	References	332
Chapter 14	RESEARCH ON CHIRAL AND BIANISOTROPIC MEDIA IN BYELORUSSIA AND RUSSIA IN THE LAST TEN YEARS <i>V. Semchenko, S. A. Tretyakov, and A. N. Serdyukov</i>	
1.	Introduction	335
2.	Material Equations for Chiral and Bianisotropic Media	339
3.	The Green Function. Radiation and Scattering in Chiral Media	340
4.	Microscopic Theory of Optical Activity	344
5.	Spherical and Cylindrical Waves. Biisotropic Waveguides	346
6.	Bianisotropic Media Electromagnetics	349
7.	Non-Linear Bianisotropic Media	353
8.	Diffraction of Light by Ultrasonic Waves in Chiral Media	356
9.	Holography in Chiral Crystals	359
10.	Conclusion	360
	References	360

Chapter 15 ELECTROMAGNETIC SCATTERING BY  
BURIED OBJECTS IN THE HF/VHF/UHF  
FREQUENCY BANDS

*R. H. Ott*

1.	Introduction	371
2.	Incident Field in Moving Frame	374
3.	Antenna Platform Motion	375
4.	Transmitted Fields in Medium 2	376
5.	Scattered Field in Medium 2	378
6.	Scattered Field in Medium 1	383
7.	Multiple Reflections	384
8.	Diffuse Scatter from a 2-D Facet Interface	387
9.	Diffuse Scatter from a 3-D Facet Interface	391
10.	Examples of EM Backscatter from Buried Targets	409
11.	Concluding Remarks	417
	References	418
