CONTENTS

Chapter 1. FINITE DIFFERENCE TIME DOMAIN (FDTD) IMPEDANCE BOUNDARY CONDITION FOR THIN FINITE CONDUCTING SHEETS

J. J. Akerson, M. A. Tassoudji, Y. E. Yang, and J. A. Kong

1	Introduction	2
2	Derivation of Impedance Boundary Condition	4
3	Recursive Convolution	6
4	Implementation of Impedance Boundary Condition in FDTD	8
4.1	Impedance Equations — Piecewise Constant Assumption	8
4.2	Impedance Equations — Piecewise Linear Assumption .	9
5	Extension of IBC to Two Dimensions	9
6	Effects of FDTD Simulation Parameters on IBC Accuracy	11
6.1	1D FDTD Simulation Configuration	11
6.2	Transmissivity Error Measurements	13
6.3	Optimum Settings	19
7	Verification of IBC in Two Dimensions	22
7.1	Calculation of Quality Factor	22
7.2	Measurement of Quality Factor in FDTD Simulations . .	26
7.3	2D Simulations and Results	26
8	Conclusion	28
	References	29

Chapter 2. THEORETICAL MODELING OF MULTI-SLEEVE MONOPOLE ANTENNAS

Z. Shen and R. H. MacPhie

1	Introduction	32
2	Formulation	33
3	Numerical Examples	42
4	Conclusions	53
	References	53

Chapter 3. RESONANT BEHAVIOURS OF MICROSTRIP ANTENNA IN MULTILAYERED MEDIA: AN EFFICIENT FULL-WAVE ANALYSIS

L. Xia, C.-F. Wang, L.-W. Li, P.-S. Kooi, and M.-S. Leong

1 Introduction	55
2 Formulations	57
3 Results and Discussion	60
4 Conclusion	66
References	66

Chapter 4. COHERENCE CHARACTERISTICS OF RADAR SIGNALS FROM ROUGH SOIL

X. Luo, J. Askne, G. Smith, and P. Dammert

1 Introduction	70
2 Theoretical Development	71
2.1 Coherence of Signals from Surfaces with Inhomogeneous Moisture Distribution within the Resolution Cell	71
2.2 Coherence of Signals from Surfaces with Homogeneous Moisture within Resolution Cell	76
3 Results and Discussions	78
3.1 Effects of Soil Moisture Inhomogeneity within Resolution Cell	78
3.2 Effects of Soil Moisture Fluctuation between Resolution Cells	83
3.3 Roughness Effects	84
4 Conclusions	86
References	87

Chapter 5. ANALYSIS OF ELECTROMAGNETIC WAVE SCATTERING BY AN ELECTRICALLY LARGE METALLIC GRATING USING WAVELET-BASED ALGORITHMIC MULTIGRID PRECONDITIONED CG METHOD

R. S. Chen, D. G. Fang, K. F. Tsang, and E. K. N. Yung

1 Introduction	90
2 Theory	92
2.1 Wavelets and Multiresolution Analysis	92

2.2	The Connection between Multigrid and Multiresolution Analysis	95
2.3	Formulation and Model of Multi-Level Method of Lines	96
3	Results and Discussions	106
4	Conclusions	110
	References	111

Chapter 6. POLYADIC METHODS IN ELASTODYNAMICS

I. V. Lindell and A. P. Kiselev

1	Introduction	114
2	Basic Quantities	114
2.1	Strain Dyadic	115
2.2	Stress Dyadic	117
2.3	The Elastic Tetradic	119
2.4	Field and Energy Equations	120
2.5	Isotropic Medium	120
2.6	Uniaxial Medium	122
3	Time-Harmonic Problems	124
3.1	Plane Waves	125
3.2	Green Functions	131
	Appendix A. Tetrads	137
A.1	Basic Expansions and Operations	137
A.2	Isotropic Tetrads	142
A.3	Uniaxial Dyadics	146
A.4	Inverse Tetradic	150
	References	153

Chapter 7. A METHOD OF MOMENTS ANALYSIS OF A MICROSTRIP PHASED ARRAY IN THREE-LAYERED STRUCTURES

Z.-F. Liu, P.-S. Kooi, L.-W. Li, M.-S. Leong, and T.-S. Yeo

1	Introduction	155
2	Analysis Techniques	156
3	Numerical Results	165
4	Concluding Remarks	166

Appendices	167
References	178

Chapter 8. NEAR FIELDS OF ELECTRICALLY SMALL THIN SQUARE AND RECTANGULAR LOOP ANTENNAS

L.-W. Li, C.-P. Lim, and M.-S. Leong

1 Introduction	182
2 General Formulation of EM Radiated Fields	182
3 Numerical Results	185
4 Conclusions	188
Appendix. Explicit Expressions of Coefficients of the Series	189
References	191

Chapter 9. COMPUTATIONALLY EFFICIENT EXPRESSIONS OF THE DYADIC GREEN'S FUNCTION FOR RECTANGULAR ENCLOSURES

F. Marliani and A. Ciccolella

1 Introduction	196
2 Dyadic Green's Function for a Perfectly Conducting Cavity	197
3 Images Expansion and Plane-Waves Representation .	200
3.1 Scheme of the Solution	200
3.2 Consideration on the Convergence	205
4 Images Expansion and Ewald's Method	209
4.1 Calculation of the Spatial Contribution	211
4.2 Spectral Domain Contribution	212
4.3 Demonstration of the Effectiveness of the Ewald's Approach	213
5 Conclusion	218
Appendix	218
References	222

**Chapter 10. BISTATIC SCATTERING AND
BACKSCATTERING OF ELECTROMAGNETIC
WAVES BY CONDUCTING AND COATED
DIELECTRIC SPHEROIDS: A NEW ANALYSIS
USING MATHEMATICA PACKAGE**

L. W. Li, T. S. Yeo, and M. S. Leong

1	Introduction	226
2	Spheroidal Wave Functions and Their Computations	227
2.1	Spheroidal Coordinates System	227
2.2	Spheroidal Radial and Angular Functions	228
3	Electromagnetic Scattering by a Conducting Spheroid	230
3.1	Spheroidal Geometry	230
3.2	The Incident and Scattered Fields	230
3.3	Transformation of incident Fields to Scattered Fields ...	233
3.4	Far Field Expressions	234
4	Electromagnetic Scattering by a Coated Dielectric Spheroid	235
4.1	Spheroidal Geometry	235
4.2	The Incident, Transmitted and Scattered Fields	236
4.3	Transformation of Incident Fields to Scattered Fields ..	237
5	Results and Discussion	238
6	Conclusion	243
	References	244

**Chapter 11. DUAL FREQUENCY POLARIMETRIC SAR
DATA CLASSIFICATION AND ANALYSIS**

L. Ferro-Famil and E. Pottier

1	Introduction	248
2	Dual Frequency Polarimetric Sar Data Statistics	250
2.1	Dual Polarimetric Representation	250
2.2	Cross-Correlation Matrix Statistics	251
3	Single Image Classification Procedure	253
3.1	Classification Algorithm	253
3.2	Application to POLSAR Data	254
4	Multi Frequency Classification Procedure	257
4.1	Dual Image Maximum Likelihood Classification	257

4.2	Dual Image Classification Using the Cross-Correlation Information	261
5	Dual Polarimetric Class Description	265
5.1	Special Unitary Transformation	265
5.2	Application to POLSAR Data.....	267
6	Conclusion	268
	References	269

Chapter 12. EFFECTIVE PERMITTIVITY OF WET SNOW USING STRONG FLUCTUATION THEORY

A. N. Arslan, H. Wang, J. Pulliainen, and M. Hallikainen

1	Introduction	274
2	Effective Permittivity of Wet Snow	275
2.1	Two-Phase Model with Non-Symmetrical Inclusions....	275
2.2	Three-Phase Model with Symmetrical Inclusions.....	279
2.3	The Debye-Like Semi-Empirical Model	280
3	Sensitivity of Two-Phase Model to Size and Shape of Water Inclusions.....	281
4	Comparison of Various Modeling Approaches with Experimental Data	285
5	Conclusions.....	289
	References	289

Chapter 13. MICROWAVE EMISSION MODEL FOR WET SNOW BY USING RADIATIVE TRANSFER AND STRONG FLUCTUATION THEORY

H. Wang, A. N. Arslan, J. Pulliainen, and M. Hallikainen

1	Introduction	292
2	The Effective Permittivity of Wet Snow	293
3	The Brightness Temperature of Wet Snow	295
4	Performance of the Model	299
5	Comparison with Experimental Data	305
6	Conclusions.....	307
	References	308

**Chapter 14. VALIDATION OF A MODIFIED FDTD
METHOD ON NON-UNIFORM TRANSMISSION
LINES**

P. T. Trakadas and C. N. Capsalis

1	Introduction	312
2	FDTD Recursion Relations for Uniform TL	313
2.1	Uniform Transmission Line Excited by Lumped Sources at its Terminations	313
2.2	Uniform Transmission Line Excited by Electromagnetic Plane Wave	316
3	Modifications on FDTD Code for Non-Uniform TL ..	319
4	Practical Examples and Numerical Results	320
5	Conclusion	327
	References	327
	 AUTHOR INDEX	 331
