## CONTENTS

**ELLIPTICAL AND CIRCULAR STEP-INDEX FIBERS  
WITH CONDUCTING HELICAL WINDINGS ON THE  
CORE-CLADDING BOUNDARIES FOR DIFFERENT  
WINDING PITCH ANGLES — A COMPARATIVE  
MODAL DISPERSION ANALYSIS**

*D. Kumar and O. N. Singh II*

1	Introduction.....	2
2	Theoretical Analysis.....	4
3	Boundary Conditions.....	6
4	Characteristic Equation.....	7
5	Results and Discussion.....	16
	Acknowledgment.....	19
	References.....	19

**ANALYSIS OF THE TEMPERATURE INCREASE  
LINKED TO THE POWER INDUCED BY RF SOURCE**

*A. Ibrahiem, C. Dale, W. Tabbara, and J. Wiart*

1	Introduction.....	24
2	The Bio-heat Equation.....	26
3	Numerical Methods and Discussion.....	28
4	Application to the Analysis of the Rise of Temperature Induced by a Handset.....	31
5	Conclusion.....	38
	Appendix A.....	39
	Appendix B.....	40
	Appendix C.....	42
	References.....	43

**ANALYTICAL TECHNIQUES TO EVALUATE THE  
INTEGRALS OF 3D AND 2D SPATIAL DYADIC  
GREEN'S FUNCTIONS**

*G. Gao, C. Torres-Verdín, and T. M. Habashy*

1	Introduction.....	49
2	The Dyadic Green's Function.....	50
3	The Principal Volume Method.....	52

4	A General Integral Evaluation Technique.....	55
5	Numerical Validation .....	57
6	Conclusions .....	60
	Acknowledgment.....	61
	Appendix A. Derivation of the Expression of the Equivalent Volume Approximation for a Singular Cell Using the Principal Volume Method .....	62
	Appendix B. Derivation of the Analytical Solution for the Integrals of the Dyadic Green's Function for a Spherical Volume .....	64
	Appendix C. Derivation of the Analytical Solution for the Volume Integrals of the Dyadic Green's Function for an Infinitely Long Circular Cylinder .....	67
	Appendix D. Derivation of the Explicit Expressions for the Integral of the Dyadic Green's Function over a Spherical Cell from the General Formula .....	69
	Appendix E. Derivation of the Explicit Expressions of the Integral of the Dyadic Green's Function over a General Rectangular Block Using the General Formula .....	71
	Appendix F. Derivation of the Explicit Expressions for the Integral of the Dyadic Green's Function over a General Rectangular Cell (Rectangular Cylinder).....	75
	References .....	77

## **SURFACE INTEGRAL EQUATION METHOD FOR GENERAL COMPOSITE METALLIC AND DIELECTRIC STRUCTURES WITH JUNCTIONS**

*P. Ylä-Oijala, M. Taskinen, and J. Sarvas*

1	Introduction.....	82
2	Step One: Presentation and Discretization of Surface Integral Equations in Dielectric Subdomains .....	85
3	Step 2: Enforcing the Boundary Conditions .....	91
4	Step 3: EFIE-CFIE-PMCHWT Formulation.....	96
5	Numerical Validation .....	99
6	Conclusions .....	104
	References .....	105

**ERROR ESTIMATION OF THE METHOD OF  
AUXILIARY SOURCES (MAS) FOR SCATTERING  
FROM AN IMPEDANCE CIRCULAR CYLINDER**

*H. T. Anastassiou*

1	Introduction.....	110
2	Analytical Considerations (TM Polarization) .....	111
3	Analytical Considerations (TE Polarization) .....	117
4	Numerical Results and Discussion .....	118
5	Conclusion .....	124
	Appendix A. ....	124
	Appendix B. ....	126
	References .....	126

**A LOW-ORDER-SINGULARITY ELECTRIC-FIELD  
INTEGRAL EQUATION SOLVABLE WITH PULSE BASIS  
FUNCTIONS AND POINT MATCHING**

*R. A. Shore and A. D. Yaghjian*

1	Introduction.....	130
2	Analysis .....	132
3	Numerical Results .....	141
4	Summary .....	144
	Appendix A. Detailed Expressions for the $Z$ Matrices, the $\mathbf{V}$ Vectors, Surface Currents $\mathbf{K}$ , and Far Scattered Fields .....	145
	Acknowledgment.....	150
	References .....	150

**ELECTROMAGNETIC SCATTERING MODEL FOR RICE  
CANOPY BASED ON MONTE CARLO SIMULATION**

*L. Wang, J. A. Kong, K. H. Ding, T. Le Toan, F. Ribbes-Baillarin  
and N. Floury*

1	Introduction.....	154
2	Electromagnetic Scattering from the Rice Plants .....	156
3	Comparison with RADARSAT Data.....	162
4	Structure of Rice Fields.....	164
5	Summary .....	167
	Acknowledgment.....	168
	References .....	168

### **FDTD ANALYSIS OF MICROSTRIP PATCH ANTENNA COVERED BY PLASMA SHEATH**

*Z. H. Qian, R. S. Chen, K. W. Leung, and H. W. Yang*

1	Introduction.....	174
2	Formulation.....	174
3	Numerical Results.....	176
4	Conclusions.....	181
	Acknowledgment.....	181
	References.....	181

### **ON THE INFLUENCE OF INCOMPLETE RADIATION PATTERN DATA ON THE ACCURACY OF A SPHERICAL WAVE EXPANSION**

*P. K. Koivisto and J. C.-E. Sten*

1	Introduction.....	186
2	Spherical Wave Expansion.....	187
3	Measurements and Calculations.....	189
4	Results.....	193
5	Conclusions.....	203
	References.....	203

### **A COMBINED BI-CGSTAB ( $l$ ) AND WAVELET TRANSFORM METHOD FOR EM PROBLEMS USING METHOD OF MOMENTS**

*M. R. Zunoubi and A. A. Kishk*

1	Introduction.....	206
2	Formulation.....	208
3	Numerical Results.....	212
4	Conclusions.....	221
	Acknowledgment.....	222
	References.....	222

### **ANTENNA MODELING BY INFINITESIMAL DIPOLES USING GENETIC ALGORITHMS**

*T. S. Sijher and A. A. Kishk*

1	Introduction.....	226
2	Methodology.....	227
3	Implementation.....	228

4	Results .....	230
5	Dielectric Resonator Antenna without Ground Plane .....	251
6	Conclusion .....	252
	Acknowledgment .....	252
	References .....	252

**STUDY OF GENERALIZED RESONANCE IN MULTI-ANTENNA SYSTEM AND GENERALIZED FOSTER REACTANCE THEOREM**

*L. Li, H.-X. Liu, Y. Shi, and C.-H. Liang*

1	Introduction .....	256
2	Poynting Theorem and Electric and Magnetic Field Energy Stored in Open System .....	257
3	Generalized Resonance in Multi-Antenna System .....	260
4	Generalized Foster Reactance Theorem and Radiation $Q$ for Antennas .....	262
5	Applications and Discussion .....	266
6	Conclusion .....	273
	Acknowledgment .....	273
	References .....	273

**POSSIBLE ELECTROMAGNETIC NATURE OF THE SATURN'S RINGS: SUPERCONDUCTIVITY AND MAGNETIC LEVITATION**

*V. V. Tchernyi and A. Yu. Pospelov*

1	Preamble .....	279
2	Origin, Dynamics and Evolution of the Rings .....	281
3	Appearance of the Rings only after the Belt of Asteroids. Absence of Rings of the Earth .....	282
4	Great Flattening of the Rings System. Sharp Edges and Rings Discontinuities .....	283
5	Thin Structure of the Saturn's Rings .....	285
6	Existence of the Planetcentral Dust Flows of Submicron Size Particles in Ring's System .....	286
7	Change of the Azimuth Brightness of the Saturn's $A$ Ring Particles .....	287
8	Forming and Development of the "Spokes" in the Saturn's $B$ Ring .....	287

9	High Reflection and Low Brightness of the Rings Particles in the Radifrequency Range . . . . .	289
10	Own Wide Band Pulse Radiation of the Ring within the 20 kHz–40,2 MHz . . . . .	290
11	Frequency Anomalies in the Thermal Radiation of Saturn’s Rings in the Spectrum Range 100 $\mu\text{m}$ –1 m . . . . .	291
12	Color Differentiation of Saturn’s Rings in Small Scale . . . . .	292
13	Phenomenon of Anomalous Inversion Reflection of Radio-waves with Circular Polarization above 1 cm . . . . .	292
14	Particles Distribution by the Sizes in Saturn’s Rings . . . . .	293
15	An Atmosphere of Unknown Origin at the Rings of Saturn . .	293
16	Existence of Waves of Density and Bending Waves in Saturn’s Rings . . . . .	293
17	Conclusion . . . . .	294
	Acknowledgment . . . . .	296
	References . . . . .	297

**RELATIVISTIC ELECTRODYNAMICS: VARIOUS POSTULATE AND RATIOCINATION FRAMEWORKS**

*D. Censor*

1	Introduction: Einstein’s Theory and Present Notation . . . . .	302
2	The Topsy-Turvy Model . . . . .	306
3	Lorentz Transformation, Phase Invariance, and Doppler Effect	307
4	Fourier Transform, Minkowski Space, and Doppler Effect . . .	308
5	Doppler Effect and Constancy of Slowness in Vacuum . . . . .	311
6	Einsteinian and Topsy-Turvy Spectral Models . . . . .	312
7	Maxwell Equations, Potentials, and Equations of Continuity .	313
8	Charge Conservation, Convection Current and the Lorentz Transformation . . . . .	315
9	Summary and Concluding Remarks . . . . .	318
	Acknowledgment . . . . .	319
	References . . . . .	319

**ELECTROMAGNETIC SCATTERING FROM PERIODIC ARRAYS OF COMPOSITE CIRCULAR CYLINDER WITH INTERNAL CYLINDRICAL SCATTERERS**

*H. Toyama and K. Yasumoto*

1	Introduction . . . . .	322
2	Formulation . . . . .	323

---

3	Aggregate T-Matrix .....	325
4	Multilayered System .....	326
5	Numerical Examples .....	327
6	Conclusion .....	332
	References .....	332
