Chief Editors: Weng Cho Chew and Sailing He

EMW Publishing
Cambridge, Massachusetts, USA
## CONTENTS

**Wideband Interdigital Capacitor with Spurious Spikes Suppression**  
Bo Zhou, Qipeng Wang, Yue Lu, and Chong-Hu Cheng ........................................... 1

**Electromagnetic Scattering from a Zero-Thickness PEC Disk: A Note on the Helmholtz-Galerkin Analytically Regularizing Procedure**  
Mario Lucido, Francesca Di Murro, and Gaetano Panariello .................................. 7

**Antenna at S-Band as Ground for Array at X-Band in Dual Frequency Antenna at S/X-Bands**  
Pratigya Mathur and Girish Kumar ................................................................. 15

**Wide-Band Patch Antenna Array with Low Cross-Polarization Characteristics**  
Fei-Biao Dong, Limei Xu, Xue-Sheng Li, Min Chen, and Xiao-Mei Xie ....................... 23

**A Novel Wideband Phase Shifter Using T- and Pi-Networks**  
Mohammad H. Maktoomi, Rahul Gupta, Mohammad A. Maktoomi, and Mohammad S. Hashmi 29

**Miniaturized Gysel Power Dividers Using Lumped-Element Components**  
Ryo Ueda and Hitoshi Hayashi ........................................................................ 37

**A Hexagonal Fractal Antenna for Navigation Application**  
En-Cheng Wang and Shao-Jie Cheng ................................................................. 45

**Synthesis of a Broadband Rat-Race Hybrid Using Transmission Lines and Lumped-Element Components**  
Ryo Ueda and Hitoshi Hayashi ........................................................................ 53

**Modeling of Multichannel Filter Using Defective Nano Photonic Crystal with Thue-Morse Structure**  
Hadis Azarshab and Abdolrasoul Gharaati ......................................................... 61

**Terahertz Graphene-Based Reconfigurable Patch Antenna**  
Mohamed Karim Azizi, Mohamed Amin Ksiksi, Hosni Ajlani, and Ali Gharsallah ........ 69

**Combination of Two Measurement Techniques to Expand the Measurements Frequency Range of the Dielectric Permittivity**  
Mohamed Wajdi Ben Ayoub, Éric Georgerin, Jean-François Rochas, and Pierre Sabouroux .... 77

**Effect of Surface Impedance on Radiation Fields of Spherical Antennas**  
Yuriy M. Penkin, Victor A. Katrich, Mikhail V. Nesterenko, and Natalia K. Blinova ........ 83

**Nonlinear Metamaterial Composite Structure with Tunable Tunneling Frequency**  
Tuanhui Feng, Hongpei Han, Limin Wang, and Fei Yang ....................................... 91
A Dual-Band Slotted Square Ring Patch Antenna for Local Hyperthermia Applications
Henn Younesiraad, Mohammad Bemani, and Saeid Nikmehr ................................................. 97

A Novel and Compact UWB Bandpass Filter-Crossover Using Microstrip to CPS Transitions
Mohamed L. Seddiki, Mourad Nedil, and Farid Ghanem ......................................................... 103

Genetic Algorithm Optimized Electromagnetic Band Gap Structure for Wide Band Noise Suppression
Bhargav Appasani, Vijay Kumar Verma, Rahul Pelluri, and Nisha Gupta ................................. 109

A Dual-Band MIMO Antenna Using a Passive Circuit for Isolation Enhancement
Peng Cheng, Deming Sun, Peng Wang, and Peng Gao ............................................................. 117

A Compact Meandered CPW-Fed Antenna with Asymmetrical Ground Plane for 5.8 GHz RFID Applications with Multiple Split Ring Resonator
Ramasamy Pandeeswari .................................................................................................. 125

Design of Dual-Band Bandstop Filter Based on Dumbbell-Shaped Resonators and U-Shaped Slot
Xueliang Min and Hou Zhang .................................................................................................... 133

Graphene-Based THz Tunable Bandstop Filter with Constant Absolute Bandwidth
Mengdan Kong, Yongle Wu, Zheng Zhuang, Weimin Wang, and Yuanan Liu ......................... 141
