

**Erratum to “PERFORMANCE ANALYSIS OF EMI  
SENSOR IN DIFFERENT TEST SITES WITH  
DIFFERENT WAVE IMPEDANCES”**

by S. Ghosh and A. Chakrabarty, in *Progress In Electromagnetics Research*, PIER 62, 127–142, 2006

Dear Sir,

Thank you for your mail regarding the comments on our paper published in PIER 62, 127–142, 2006.

We agree with Dr. Sandeep M. Satav and the Editorial and Production Board that there was a mistake in the paper considering the wave impedance of the TEM mode propagating in a GTEM Cell as 50 ohms.

However, the main objective of the paper was to analyze the performance of EMI sensor in different test sites with different wave impedances and the GTEM Cell was taken as an example. Hence the main theme of the paper does not depend on the wave impedance inside the GTEM Cell. So the content of the paper does not lose its importance if we consider the GTEM Cell as a medium with wave impedance 377 ohms.

Thank you once again for your assistance to clear out the confusions.
